**NL** Het spel: Zorg voor een leeg spelbord en laat de spelers een symbool uitkiezen. Start het spel door om de beurt een symbool op een van de negen velden op het spelbord te plaatsen. Degene die als eerste drie van zijn eigen tekens op een rij heeft (diagonaal, verticaal of horizontaal) heeft gewonnen.

**FR** Le jeu: Videz la grille de jeu et faites choisir un symbole aux joueurs. Commencez à jouer en plaçant, chacun à votre tour, un symbole sur une des neuf cases de la grille de jeu. Celui qui parvient en premier à aligner ses trois signes (diagonalement, verticalement ou horizontalement) a gagné.

**EN** How to play: Clear the play-board and let the players choose a symbol. Start the game by, in turn, placing a symbol on one of the nine fields on the play-board. The first player to have three of his/her own symbols in a row (diagonal, vertical or horizontal) is the winner.

**DE** Das Spiel: Stellen Sie sicher, dass das Spielfeld leer ist und lassen Sie die Spieler ein Symbol auswählen. Starten Sie das Spiel, indem Sie abwechselnd ein Symbol auf einem der neun Felder auf dem Spielfeld platzieren. Der erste Spieler, der drei seiner eigenen Symbole in Folge (diagonal, vertikal oder horizontal) hat gewonnen.

**ES** El juego: El tablero deberá estar vacío y los jugadores deberán elegir qué símbolo quieren usar. Empieza el juego colocando por turno un símbolo en una de las nueve casillas del tablero. El primero que consiga poner sus tres fichas en línea (diagonal, vertical u horizontal) ganará.

**EN** Set up: Flip a coin to decide who will start and who will be black. Position the pieces on the dark blocks of the 3 outer rows; position the black pieces on one side and the white pieces on the other side.

**How to play:** Every turn you may advance your piece one field diagonally towards your opponent's pieces. You can capture your opponent's piece if your piece is next to your opponent's piece and there is an unoccupied square immediately beyond that enemy piece. Move your piece two squares if you are able to make a capture and jump over your opponent's piece to capture it. It is also possible to jump several pieces in one turn. When it is possible to jump over a piece, you must do it. You can jump forwards or backwards. When you have captured your opponent's piece, you must remove it from the board. If your piece stops on the far edge of the board, it will be crowned. A crowned piece, contrary to an ordinary piece, can be moved over a number of squares diagonally, both forwards and backwards.

The game ends when a player has captured all its opponent's pieces or when there aren't any valid moves left to take (a tie).

**NL** Het Spel: Deel de bingokaarten en fiches uit onder alle spelers en start het spel! Alle spelers kijken om zich heen om de afbeeldingen die op hun kaart staan te spotten. Je mag een afbeelding afdekken met een fiche wanneer op een rij roep 'BINGO!' en winst het spel! Meer uitdaging? Ga dan voor een volle bingo kaart!

**FR** Le jeu: Distribuez les cartes et fiches aux joueurs et commencez à jouer! Tous les joueurs regardent autour d'eux pour repérer les images qui se trouvent sur leur carte. Vous pouvez couvrir une image avec une fiche quand vous l'avez vue en vrai. Le premier joueur qui a 5 fiches sur une rangée crie 'BINGO!' et gagne le jeu! Vous voulez un plus grand défi? Optez alors pour une carte bingo complète!

**EN** How to play: Divide the bingo cards and chips amongst the players and start the game! All the players look around to spot the pictures on their card. When you've spotted a picture, you can cover it with a chip. The first player with 5 chips in a row calls 'BINGO!' and wins the game! Need more of a challenge? Go for a full bingo card!
